

#### Application:

Oventrop brass ball valves “Optibal” with full flow are used in industrial, commercial and domestic installations for the isolation of pipes transporting fluids. Depending on the model, they may be used for the following fluids: water, mineral, heating, hydraulic and diesel oil and air (see also table on the last page).

Nominal pressure PN 16 for water temperatures up to 100 °C.

#### Function:

The valve is opened/closed by turning the lever/handle by 90°. The position of the ball is indicated by the position of the lever or handle which moves parallel to the ball. Even if the lever or handle is removed, the stem with two flats still indicates the position of the ball.

Note: It is recommended to operate ball valves which are in a permanent position once or twice a year.

#### Advantages:

- full flow according to DIN 3357-4 and DIN EN 1983
- wide range of application
- all standard types of handles are available:
  - lever made of galvanised steel with red plastic coating
  - T-handle made of red lacquered metal
  - anthracite extended plastic handle with red cover plug
- suitable for high pressures due to blow-off proof stem and solid bodies
- PN 16
- ball valves with metal T-handle or steel lever may subsequently be equipped with an extended plastic handle by use of the conversion set, item no. 1076071-73
- simple insulation of the models with extended plastic handle or stem extension
- extended plastic handles may subsequently be equipped with a thermometer by use of the thermometer conversion set, item no. 1077181-83
- model with press connection for copper and stainless steel pipes available
- components and auxiliary materials free from silicone
- suitable for water and glycol mixtures with a maximum glycol proportion of 50 %

#### Insulation:

The Oventrop brass ball valves “Optibal” with extended plastic handle may be equipped with standard insulations according to the German Energy Saving Directive.

Oventrop offers insulations shells (see accessories) for the brass ball valves “Optibal” with female thread or press connection on both ports.

“Optibal”

Flow chart

Flow values (water):

The flow values may vary due to the different screw-in depths of the threaded pipes into the ball valve and a not fully opened switching ball.

20	43	50	254		

**“Optibal” Ball valves, brass, nickel plated,  
both ports female thread:**

Application:

Heating systems, water, industry.

Pipeline fitting for fluids.

Up to DN 50:

Max. operating pressure  $p_s$ : 16 bar (PN 16), for cold water  
20 bar, for air and other harmless gases\*) 10 bar.

Operating temperature  $t_s$ : -10 °C up to +100 °C

DN 65 up to DN 100:

Max. operating pressure  $p_s$ : 16 bar at 70 °C (PN 16)  
12 bar at 85 °C  
8 bar at 100 °C

Operating temperature  $t_s$ : -10 °C up to +100 °C

Ball valve with galvanised steel lever, DN 65 - DN 100, item no.  
1076020-32, CE marking according to directive 2014/68/EU.

Attention: Prevent formation of ice as it can destroy the pipework  
and valve.

\*) not for gaseous fluids group 1 according to directive 2014/68/  
EU (e.g. toxic or flammable gases) and not for oxygen.

Construction:

Two-piece body made of brass, nickel plated, full flow, ball  
made of chrome plated brass with PTFE seats, brass stem with  
double FKM O-ring seal.

Construction:

Two-piece body made of brass, nickel plated, full flow, ball made of chrome plated brass with PTFE seats, brass stem with double FKM O-ring seal, both ports press connection made of bronze or one port female thread and one port press connection.

Press connection:

For the direct connection of copper pipe according to EN 1057 and stainless steel pipe “NiroSan”.

Pressing must be carried out to tighten the connection.

Only use press jaws with the original contours SANHA (SA), Geberit-Mapress (MM) or Viega (Profipress) in corresponding size.

Dimensions item no. 1075704-10 (DN 15 up to DN 32)  
Extended plastic handle

Dimensions item no. 1075804-10 (DN 15 up to DN 32)  
Metal T-handle (up to DN 25 aluminium, DN 32 galvanised steel)

**Accessories:**

**Conversion set plastic handle (anthracite)**

For subsequent insulation of the pipework with mounted ball valves with metal lever or T-handle, the conversion to an extended plastic handle is recommended.

Sizes	Distance *)	Item no.:
up to DN 15	35 mm	1076071
DN 20 + DN 25	36 mm	1076072
DN 32 – DN 50	64 mm	1076073

\*) Distance between the upper edge of the body and the lower edge of the handle = space for the insulation

**Thermometer conversion set (anthracite)**

Consisting of and anthracite thermometer 0 – 100 °C and a special screw.

Sizes	Item no.:
up to DN 15	1077181
DN 20 + DN 25	1077182
DN 32 – DN 50	1077183

**Stem extension**

To upgrade ball valves with metal lever or T-handle. The swivel insulation shell can be sealed at the insulation by use of silicon for a diffusion tight insulation of cooling systems for instance.

Sizes	Extension	Item no.:
up to DN 15	38.5 mm	1076081
DN 20 + DN 25	39 mm	1076082
DN 32 – DN 50	64 mm	1076083
DN 65 – DN 100	85 mm	1076084

**Blue cover plug for riser identification**

For replacement of the existing red cover plug of the extended plastic handle.

Sizes	Item no.:
DN 10 + DN 15	Set of 10 pieces 1077171
DN 20 + DN 25	Set of 10 pieces 1077172
DN 32 – DN 50	Set of 5 pieces 1077173

**Insulation shells:**

For ball valves with female thread or press connection with extended plastic handle and subsequently installed stem extension.

The double insulation shells made of anthracite coloured expanded polypropylene are easy to use and can be reused.

Building material class B2 according to DIN 4102.

Thermal conductivity 0.035 W/mK.

Meets the requirements of the German Energy Saving Directive according to appendix 5, table 1, line 5.

DN	d	D	L
10 + 15	1/2	74	74
20	3/4	81	78
25	1	94	95

Dimensions item no. 1078092-97 (DN 10 up to DN 50)

**Resistance of the ball valves to fluids being transported:**

The indications in the table are for general orientation. Unknown factors may impair the resistance considerably. Therefore the given values are not binding. The “Optibal” ball valves are not DVGW registered.

Values of resistance:

- 1 : low or no affect
- 2 : low or moderate affect
- 3 : strong affect, may not be used
- : no data existing

Fluid	Value of resistance	
	107 6x 10771 (without press connection) 10773 10780	10757 10758 10771 (with press connection) 10778
