

HydroControl
Reliability simplified.

Large-scale hydronics. Modular control.

We've enhanced our **HydroControl** family to make your job easier and quicker. Only one thing doesn't change: also our new **balancing valves** are extremely reliable. They are *made in Germany* and are manufactured in the proven Oventrop quality. The new **HydroControl** generation offers many benefits for HVAC experts and owners:

BENEFITS FOR CONSULTANTS AND CONTRACTORS

- + *Simple sizing* thanks to a wide flow range
- + *Simple selection*: measure, drain and fill with HydroPort (always included)
- + *Best control quality* even at low settings

BENEFITS FOR WHOLESALERS

- + *Few versions* saves storage space
- + *Suitable for every application*
- + *Modular system*: nominal sizes up to DN 400

BENEFITS FOR INVESTORS AND OWNERS

- + *Long-term reliability* and precision
- + *Functional quality*
- + *Hydronic balancing for every kind of building*

Quicker and easier

Extremely reliable

Sustainable Oventrop quality

Our new balancing valves make your job easier.

HYDROCONTROL BALANCING VALVES

- For the modular hydronic balancing of distribution pipes in central heating and cooling systems with closed circuits
- Determine the flow through differential pressure measurement with the OV-DMC 3 measuring system
- Y-pattern body with secured, at any time controllable, infinitely adjustable fine presetting
- All functions are accessible from the top
- Supplied with HydroPort auxiliary valves for measuring, draining and filling as standard
- Robust and ergonomic
- All components made in Germany

HydroControl V
Double regulating
and commissioning valve

HydroControl M
Double regulating
and commissioning valve
with measuring orifice

HydroControl D
Differential pressure regulator

HydroControl A
Shutoff valve
