

Temperature Sensor NTC 10 K

for ClimaCon F 310 24 V

The ClimaCon F temperature sensor is used as an external temperature sensor to detect the temperature in the room or the surface temperature as limiter.

To evaluate the sensor, this must be set in the ClimaCon app. To do this, open the app and navigate to "Extended settings". Select the use under "Sensor terminal configuration":

- If the sensor is used as an external temperature sensor, select the "External sensor" function. The actual temperature from the externally connected sensor is then used for temperature evaluation.
- If the sensor is used, for example, as a pipe contact sensor for surface temperature limitation, select "External limitation".

Technical Data

Temperature range	-5...+70 °C
Protection class	IP 63
Colour	Grey
Sensor element	NTC 10 K
Cable	PVC 2 x 0.34 mm ²
Cable length	2 m
